DETAILED ACTION

1. Claims 1 – 8 are cancelled; claims 9 – 16 are presented for examination.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description:

Item "inductor 12" is mentioned with reference to Figure 5 on:

Page 8, line 23;

Page 9, line 12;

Page 9, line 23;

but the item "inductor 12" is not found in Figure 5.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to because of the following informality:

Page 9, line 8: "capacitor C1' " not found in Figure 5.

For the purposes of examination, it is assumed that capacitor C'1, found in Figure 5, was intended.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The abstract of the disclosure is objected to because of excessive length.
Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper language and format for an abstract of the disclosure. The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details. The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

EXAMINER'S AMENDMENT

5. Authorization for this examiner's amendment was given in a telephone interview with Kenneth Bemer, Reg. No. 37,093 on 1/03/2008.

In the Claims:

Claim 9, lines 3 and 4:

(Amended): "a network in parallel with the inductor and connected to the terminals A and B having a resistor R2 in series with the combination of a resistor R1 in parallel with a capacitor C1".

Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Allowable Subject Matter

6 Claims 9 – 16 as amended in paragraph 5 above are allowable over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach in combination as claimed a device for measuring current in an inductor to be connected in parallel with the inductor, the device having a voltage offset circuit having a DC voltage generator in series with a second resistor network, connected to first resistor network as claimed; a temperature compensation circuit comprising a current source controlled as a function of temperature connected to different points in the measuring device as claimed; and a measurement of the image of the current in the inductor between the common points of resistors R1 and R2, and the common point of the offset resistor and of resistors R3 and R4, as in claim 9.

The dependent claims, definite and enabled by the specification, are also allowed.
